EDUCATION

B.Tech in Computer Science Engineering

Delhi Technological University

CGPA: 7.8

2023 – 2027

Delhi, India

Class XII

Banyan Tree School

83.4%

2022

Delhi, India

Class X

Banyan Tree School

95.2%

2020

Delhi, India

EXPERIENCE

USIP intern

Delhi Technological University

Sep 2024 – Nov 2025

Delhi, India

- Built a responsive departmental web interface using HTML5 and CSS3, leveraging semantic markup, Flexbox/Grid, and media queries to achieve optimal performance across multiple devices and screen sizes.
- Structured and presented student and faculty datasets effectively, improving information accessibility, UI consistency, and the overall user experience.

SKILLS

Languages — C, C++, Java, Python, MongoDB, JavaScript (React.js, Node.js, Express.js), HTML/CSS, SQL (PostgreSQL, MySQL), AI/ML

Tools — Figma, Canva, GitHub, Git, VS Code, MySQL, Notion, LLMs, RAGs, API and Integrations

Courses — Data Structures and Algorithms, Operating Systems, DBMS, Computer Networks, Distributed Systems, Blockchain, Information Network and Security, Compiler Design, Data Warehouse and Data Mining, Parallel Computer Architecture, AI/ML

PROJECTS

Real-Time Collaborative Code Editor

- Built a multi-user collaborative code editor with real-time synchronization using Socket.IO.
- Integrated live code execution for multiple programming languages using the Judge0 API. Implemented room-based collaboration, user presence tracking, and instant code updates.
- Developed a responsive frontend using React.js and managed backend services with Node.js and Express.js.
- Used MongoDB for storing session data and GitHub for version control.

VeriTrust Project

- Created an AI-powered document verification platform using Next.js, TypeScript, Python, and FastAPI to analyze uploaded files and detect potential tampering or AI-generated content.
- Built a frontend with secure file uploads and real-time analysis feedback, enabling efficient and user-friendly document authenticity assessment.

Web Design Project: E-commerce Website (Amazon Clone)

- Architected an e-commerce website using HTML, CSS, JavaScript.
- Built a responsive Amazon-like e-commerce site with user login, product listings, cart, and checkout features. Integrated an admin panel for managing products and orders.

Machine Learning Project

Sentiment Analysis

- Worked on a machine learning model for emotion detection from text, addressing a classification problem involving data preprocessing, feature engineering, and model training.
- Applied algorithms to achieve accurate predictions and insights.

DBMS Project

Hotel Booking Management System

- Designed a Hotel Booking Management System using DBMS to handle reservations, customer data, room availability, and billing with efficient SQL queries and relational schema design.
- Application of MySQL.

ACHIEVEMENT

Smart India Hackathon 2024

Selected among the top 15 teams from college to and qualified for second round.

- Developed an AI-powered museum ticket booking chatbot enabling users to book tickets, check availability, and receive instant confirmations through conversational interaction.
- Integrated LLM and RAG-based architecture to provide multilingual support, real-time query handling, and personalized visitor assistance.
